### Notes:
- (1) Mandatory For all Canadian Provinces
Seat belts should always be worn for passenger safety. Seat belts are designed to provide maximum protection when properly worn. They are effective in reducing the risk of injury or death in the event of a collision, sudden braking, or sudden acceleration. Therefore, all seating positions equipped with a seat belt may be occupied while the vehicle is in motion, without regard to other weight factors.

All Sportscoach motorhomes are designed to ensure that the number of passengers allowed while the vehicle is in motion will always at least equal the stated seating capacity. According to the National Highway Traffic Safety Administration (NHTSA), the maximum number of passengers allowed while the vehicle is in motion, without regard to other weight factors, is determined by the vehicle’s seating capacity. The seating capacity is the maximum number of passengers that can be seated in the vehicle, including the driver. Therefore, the number of passengers allowed while the vehicle is in motion, without regard to other weight factors, is the same as the seating capacity.
